**Stonewash:** Stone washing is a process to produce the aged appearance of garments. Pumice stone is volcanic and is used because of its strength and lightweight. It increases the handed feel of the garment. Pre-washed, abraded, faded either or irregular looks are produced by subjecting the dyed garments to serve washing treatments commonly known as Stone Wash garments.

**Wrinkle Resistant Finish:** This finish helps the textile to retain the original look and smoothness over a longer period of time and for many home laundering cycles. This finish is achieved by using resins and a combination of finishing chemicals.

**Bio-Polish / Enzyme Wash:** Bio-polishing is the enzymatic treatment given to garments to give the following effects:

- Removes the protruding fibres from the surface
- No pilling or hairiness
- Provides a smooth and clean look
- Imparts a soft feel to the fabric

**Silicone Finish:** Silicone finish provides Softness, lasting Elasticity, Soft handle, good sewing property, permanency after repeated washing to both natural and manmade fabrics as well as woven and knitted fabrics.

**Anti Microbial Finish:** This finish protect user from the infections, cross contamination, allergies, bugs, bacteria. It helps increase the life of the product by protecting the fabric for detrimental effects of these micro organisms. Retain freshness by resisting the growth of odor-causing bacteria and mildew.

**UV Protection Finish:** UV rays contribute to skin damage and ageing of skin, DNA damage and skin cancer. This finish helps in blocking the UV rays of the Sun. Protect the body from the damage.

**Fragrance Finish:** Mainly avoid Bad odour and give pleasant smell. Special fragrances such as strawberry, lemon, rose, and lavender can be applied into the fabric. Fragrance is liberated when fabric undergoes gentle abrasion or friction. Can say a "Scent-Sational" finish?

**Elastomeric Finish:** Elastomeric finish increases the elasticity of the garment. Because of elasticity effect hand feel improves much and looks similar to Lycra Effect.

**Water & Oil Repellent Finish:** This finish helps to eliminate the possibility of water and oil based stains repelling these liquids. It has good wash durability. Free from worries of Stain.

**Moisture Wicking Finish:** It increases wet ability of the garment along with goods hand feel. It helps to absorb the sweat quickly and transport it to the outer surface of the garment. Evaporates the sweat fast and keep the body dry and cool.
